ERRATA

Every effort was made to make this list of bibliographies accurate; however, certain errors have crept into the text. Because of difficulties of reproduction (by mimeograph), accent signs,umlauts, lines through the letter ø, etc., in many cases fail to appear on the finished pages. This in no way effects the authority of this work and we will not list them here; but a careful recheck of the finished pages brought to light some errors which we feel are important enough to warrant correction and we list them below.
